Materials List

@uofucontinue

Required Materials:

- A drawing/drafting compass, Blick, Rotring, Ecobra, and Staedtler are all recommended brands of compass. This is a good basic option <https://www.dickblick.com/products/blick-masterbow-compass/> and this is a little nicer <https://www.dickblick.com/products/blick-geometry-compass-set/>
- A ruler, any length between 12 and 24 inches should be fine.
- A sharp pencil (and sharpener) or mechanical pencil
- For the final class please bring some way to color your final piece; you could use colored pencils, markers, acrylics, watercolor, etc. If you choose to paint you will need to provide the brushes, water jar, pallet, etc.
- An eraser

Optional Materials:

- Tracing paper, some of the things we will draw can get a little complicated and tracing paper can help to keep things straight. We will be using paper that's about 9x12 inches in class.
- Tape, for keeping tracing paper in place.
- Colored pencils or fine tipped markers these can also be useful in keeping track of the design as it progresses.
